

illuminata

ART GLASS DESIGN LLC

Glass artist Julie Conway creates bespoke, large-scale illuminated hospitality glass installations for international hotels, restaurants, commercial development projects, & custom home lighting collections. Julie's signature specialty is collaborating with architects, designers, and clients to create the perfect feature lighting design elements for interior spaces and hospitality design.

What can we create today together?

Julie is your lighting design & glass specialist that can bring extraordinary international lighting projects to life.

With more than 25 years studio practice, running a woman-owned business, speaking 4 fluent languages and history of working in the global glassmaking facilities, Julie is your resource for glass, light, suspension and "wow"!

Illuminata is OMWBE + ACDBE certified and has been featured in museum shows received several international lighting & design awards.

Julie has dedicated her studio practice by combining traditional glass techniques with contemporary lighting design aesthetic, and use of sustainable materials and eco-efficient process.

Julie operates a vibrant studio in Seattle, WA, orchestrating talented teams of glassmakers, fabricators, contractors & electricians to execute her custom illuminated glass commissions. With 20+ years of glassmaking experience melded with design and craft, each blown glass fixture is a functional artwork, and architectural feature.

LUMI COLLECTION, is the ready-made series offered by the studio bringing on-demand, customizable decor, textiles, & lighting products to any space.

ILLUMINATA ART GLASS DESIGN is ever expanding and your partner to create phenomenal illuminated glassworks.

client reviews

"Julie makes our custom blown pendants. Working with Julie is a pleasure. She instinctively gets what our clients want, and has always managed to delight them!" -- B  b   Regnier, Owner, Lampworks, NYC

"Julie is truly a special artist and one of my most treasured assets. Her glorious glass work is the 'jewelry' for my one of a kind interior design projects." --Guy Clark, Guy Clark Interiors

O M G that piece is MAGICAL!!!! Julie you are BRINGING IT!!! This is seriously gorgeous. Major gorg. Never seen anything like this before...its like a wonderful underwater sea creature. On acid. And that's a compliment!!!! --Home owner

"Julie's energy and commitment to glassblowing, color, integration with architecture and collaboration is unlike anything we've experienced as architects." --Leah Martin, Allied 8 Architects

future of design eco designer

green design glass

Green energy is not a fad for me, but a lifestyle. I have lived "off-the-grid," driven my car with a hydrogen generator, participated in the United Nations' World Environment Day, and currently, I live in a Green-Built Certified home in Seattle, WA.

LUMi Collection utilizes recycled glass, a zero-carbon footprint furnace fueled by vegetable oil, low-energy LED solutions, & reclaimed metal components. Product created with environmental appreciation and reclaimed materials can elevate it to tell a story, and can leave a legacy. .

Julie is a founding member of BioGlass.org, (2006) originally a 501(c)3 non-profit, now a group dedicated to the education and development of eco-efficient glassmaking solutions.
